TELEGRAPHIC NEWS

The Coronation—Exploration of the Lena.

New York, 28.—Herald's St. Petersburg, December 27: The first part of the stipulated money of indemnity for the cession of Kuldja, was paid to Russia by the Chinese government three days ago.

Several court officials have been ordered to proceed to Moscow to make a careful examination of all the costumes and accessories which the Russian tradition requires to be used at the Imperial coronation. This warrants the supposition that the ceremony is to take place earlier than was expected, probably before the confinement of the Empress.

The new Russian expedition to explore the mouth of the Lena is under the direction of Nicholas Jurgin, officer of the corps of pilots. The mathematician, Meighen, is charged with astronomical and meteorological observations. The medical doctor, Bange, will direct the zoological and botanical researches. In addition to these, the expedition will be composed of eleven soldiers, two of whom are Constable. The others will be taken by the local troops to Irkutsk. The expedition goes by way of Moscow and Nijui Novogorod, where it will provide itself with the provisions, clothing and instruments necessary, besides five sledges for their conveyance. From Nijui it will proceed to Irkutsk by way of Ekstunburg and Tomsk. Next spring it will leave Irkutsk and will proceed by the Lena toward the frozen sea. As the limits of the wooden region is at a great distance from the mouths of the Lena, the expedition will have to carry with it from Yakoutsk, the wood necessary for constructions and firing. The expedition will begin its scientific labors on August 1st, 1882, and will continue them till the same date in 1883. This expedition is naturally independent of three others which, by order of General Ignatieff, will employ the most rapid means of reaching the shipwrecked people; but its programme will give an idea of the efforts which must have been made, and the difficulties surmounted by the messengers who brought the news, and of the ordeals through which the survivors will have to pass before they arrive at Yakoutsk.

Fearful Apprehension.

London, 27.—Captain Leperson, of the *Ernestine*, arrived at Beirut, Syria, that during a gale on the 20th, he was in company with a large steamer, which kept within about a mile and a half of him from 5 in the morning until 2 in the afternoon. Just then a violent squall occurred, lasting about twenty-five minutes. When it passed by the steamer was no longer to be seen, and he thinks it sank in the squall. A quantity of wreckage, which was driven ashore on the following day, at Rosoff, gave an air of probability to the reported disaster. The wreckage consisted of bales of cotton, a cask of whale oil, and various pieces of wood, on which was written, "Spitting upon deck and bulwarks prohibited." The steamer appeared to Captain Leperson to be from 2,000 to 3,000 tons burden. She had a straight stern, with bowsprit like one of the Glasgow steamers, and was schooner-rigged; her foremast had two yards, with square sails, and hull and funnel painted black. She was under steam, proceeding very slowly, when the squall struck her.

A Black Eye for Sargent.

New York, 28.—Times editorial: There are people in Washington who insist that the cabinet positions still to be filled will be given to Sargent, of California, and Chandler, nominally of New Hampshire. Why such a man as Sargent should be deemed a proper person to discharge the very difficult and responsible duties of secretary of the interior, does not admit of easy explanation. One would imagine that the department around which gather half the jobbers and schemers who desire to swindle government, would require at its head a man of unquestioned integrity, and of exceptional strength of character. The President has not been credited with having such a man in view, but it is to be hoped that he will come nearer the ideal secretary than Sargent.

Mickey Matters.

Dublin, 27.—Phillips, the League ex-accountant, has been released from Dundalk jail on condition that he accepts no further employment under the League.

London, 27.—The Times says: It is believed many more sub-commissioners under the land act will be needed if the arrears are not to be allowed to accumulate disastrously.

Dublin, 28.—Meeting of the Irish home manufacturers adopted a resolution to communicate with the members of the late industrial exhibition committee, with regard to having an exhibition of Irish manufactures in 1882.

A circular of the Ladies' League, summoning all branches of that organization to meet on Sunday, is issued for the purpose of testing the legality of ladies' meetings.

Fire.

Martin, Texas, 27.—Last night Adams' grocery house and all the buildings between Carter's bank and Wool's corner burned. Loss, \$60,000; partly insured.

Moravia, Iowa, 28.—An incendiary fire yesterday destroyed five stores and a lot of frame buildings. Loss, \$20,000; nearly all insured.

Merillan, Wis., 18.—C. N. Paine & Co.'s saw mill burned. Loss, \$25,000; insured \$15,000.

Baltimore, 18.—A fire this morning in warehouse Nos. 86 and 88 Camden street, destroyed property of various firms to the amount of \$30,000; insured.

Plenty of Wheat.

Odessa, 28.—It is calculated that the Odessa magazines contain a million and a half quarters of grain ready for exportation, and that other Black Sea ports have an equal quantity. The total is valued at 30,000,000 roubles. Business is quiet because of the low prices in England and France.

A Light Ship Run Down.

London, 28.—A Southark light ship, coast of Ireland, has been run down by a four-masted vessel, believed to be American. The men belonging to the light ship were saved. Three steamers left Queenstown in chase of the vessel that caused the accident.
